# **BYU Educator Preparation Program 2017 – 2018 Annual Report**

**Aggregate Report for the Entire EPP**

Prepared by the EPP Support Team  
August 2018

Dear Educator Preparation Program members:

As the 2017-2018 academic year comes to a close, the Educator Preparation Program (EPP) office and I want to express how grateful we are to work with you to prepare the next generation of educators. Teaching is a noble profession and your efforts to prepare high quality educators is a moral endeavor critical to the health and well-being of our society. A well-educated citizenry helps safeguard our liberties and the educators you prepare will be instrumental in realizing that end. Thank you for moving this sacred work forward and striving to continually improve your practice.

The EPP office and I are pleased to present the 2017-2018 EPP annual report and celebrate in your successes. We have worked hard to expand the EPP report to provide a richer and more well-rounded view of your programs and candidates. We have included data from three of the four major EPP transitions: T1) Admissions, T2) Pre-Clinical, and T3) Clinical. We will be adding data from T4) Alumni in the 2018-2019 report after collecting alumni and employer surveys.

You will notice in this report that we have added enrollment and demographic information to help characterize the candidates in our programs. We are all aware that enrollments are down, so we wanted to make transparent current enrollment, as well as attrition and graduation rates. 2017-2018 saw the launch of several EPP-wide recruitment efforts and having enrollment, attrition, and graduation data will help us measure our progress.

Another new feature of this report is the inclusion of EPP professional core data. All of our candidates take EPP professional core courses and we wanted to share how our candidates are performing in these courses. EPP professional core courses are foundational to our candidates' success in the classroom. Understanding how well they are learning these critical constructs will help us improve our programs. We hope that the EDA will provide us a new insight into the perceptions of our candidates and how they are developing Christ-like attributes so that all students learn.

Along with these new features of the report, you will find the more traditional EPP assessment data. We have included data and statistical analysis for GPA, PAES, Praxis, and RTWS and have added TSA and UTESS. We will be adding the EDA, our newly adopted dispositions assessment, to the 2018-2019 report.

We hope that this 2017-2018 report will be useful and help you reflect on candidate learning and program outcomes. We invite you to carefully review the results presented in this report and set goals for improving your programs. We look forward to the upcoming academic year and further strengthening our programs, while preparing high quality educators to meet the challenges of tomorrow's classrooms and schools. Thank you again, for your hard work and sacrifice. May the Lord continually bless your efforts.

Sincerely,

A handwritten signature in blue ink, which appears to read "J. Aaron Popham". The signature is fluid and stylized, with a large loop at the end.

J. Aaron Popham, Director  
BYU Educator Preparation Program

## Executive Summary

### Annual Report Mission

The 2017-2018 Annual Report is a presentation of facts and figures in each Education Major. Our goal for this report is to provide information about candidates in education programs to assist programs in identifying areas of success and places to improve. We hope this report will aid your program in achieving continuous improvement.

### Data Extraction Methodology

The EPP Office and its support team began compiling data in April and continued through mid-June. We used information submitted through the mYlink system, admissions cohort data provided by individual programs, BYU AIMS data, BYU SAAS data, and the Educational Testing Service (ETS).

Data from every source was compiled into a Microsoft Excel spreadsheets, which the EPP support team either used Excel functions to input data or inserted data by hand. Every team member understood the coding process before harvesting the data, a process which was a group effort in order to reduce error.

### Report Content

The report begins with an Administrative Overview for the program, which is followed by a Biographical Overview that breaks down the major by gender, socioeconomic status, marital status, age, and ethnicity.

The report provides performance statistics for each Transition, or each stage of the major. It goes through each transition and gives results for required assessments; where possible, program results are compared to EPP results. Students fall within Transition One (T1) until an admission decision is made. Transition Two (T2) is when a candidate has been accepted and is currently taking courses on BYU campus, as well as completing the first stage of their field-based learning (e.g. practicum experience). Transition Three (T3) is when a candidate is currently enrolled in their Student Teaching or Internship experience. The last section of the report is the appendix, which provides more detailed graphs and definitions of key variables to help readers understand the data.

### Limitations

There were several limitations when creating this report. Deciding which transition a candidate belongs to, particularly when distinguishing between T1 and T2, was difficult. We had to hand enter a large amount of data—seven employees were involved in the process, which explains some discrepancies among the various populations. Furthermore, the mYlink data does not accurately reflect the true population due to system malfunctions.

### Conclusion

We hope that this report will be useful to your program as you seek continuous improvement. This is the first time our department produced a report as detailed as this, and we thank you for your patience. There may be errors and weaknesses in presentation, so if you have any feedback or comments please let us know. You can contact us at [eppsupport@byu.edu](mailto:eppsupport@byu.edu).

Best Regards,

The EPP Support Team

Samuel D. Allan, Hannalee Allen, Madalyn Wilkins, Isabella Wilkins, Cale Sieverts, Allie King, and Madeleine Dame

# BYU Educator Preparation Program Annual Report

Aggregate Report for the Entire EPP

## Administrative Overview

The Administrative Overview goes over the program size and various candidate make up.

In 2017-2018, the Educator Preparation Program had 1,623 candidates enrolled in various pre-majors, 380 candidates in Transition 1, 1123 candidates in Transition 2, and 494 candidates in Transition 3.

Figure 1. Program Flow

Three hundred thirty-eight students graduated from Educator Preparation Programs. While many candidates pursue licensure, 77 could not be accurately identified as seeking licensure, or have yet to apply.

Figure 2. Graduated and Licensed

The accurate and available data shows that candidates prefer completing student teaching over an internship, with 93% of the candidates choosing student teaching.

# BYU Educator Preparation Program Annual Report

## Aggregate Report for the Entire EPP

### Transition 1: Admissions

The following is the beginning of the Transition 1 section. Transition 1 is comprised of candidates who have applied for and been accepted into the major but have not begun course work. This section does not reflect the actual number of candidates admitted to program admissions cohort(s); the data population includes all active pre-majors during 2017-2018 and candidates who have transitioned from pre-major to major but have not yet started major course work at the time of data collection. This section includes results for candidates' GPA, ACT, UTESS, and TSA results.

## GPA

Figure 9. Total and BYU GPA at Admissions

Table 6.

T1 Total and BYU GPA

	EPP Total GPA (PreM)	EPP Total GPA (Maj)	EPP BYU GPA (PreM)	EPP BYU GPA (Maj)
<b>Max</b>	4.00	4.00	4.00	4.00
<b>Min</b>	0.18	0.53	0.18	0.53
<b>Average</b>	3.43	3.47	3.25	3.43
<b>St Dev</b>	0.57	0.48	0.65	0.51
<b>Count</b>	1258	491	858	466
<b>% of Total</b>	77.94%	96.46%	53.16%	91.55%
<b>Missing</b>	356	18	756	43
<b>% of Total</b>	22.06%	3.54%	46.84%	8.45%

Note: Maj = Major, PreM = Pre-major

# BYU Educator Preparation Program Annual Report

## Aggregate Report for the Entire EPP

### Transition 1: Admissions

#### ACT

This ACT section is looking only at candidates who are declared as both education pre-majors and education majors in Transition 1.

Figure 10. ACT Results

Table 7.

ACT Results

N = 1,975	EPP Average	EPP St Dev	Min	Max
Composite	27.47	3.66	16	36
Math	26.19	3.78	15	36
English	28.38	4.74	15	36
Reading	28.57	4.66	14	36

Note: The data contains SAT and ACT data combined. The ACT English score is equivalent to the SAT Language and Writing score and the ACT Reading score is equivalent to the SAT Verbal score. Data transformations for the ACT English Results could not be performed for SAT Language and Writing Results, hence the count discrepancy for English.

Aggregate Report for the Entire EPP

Transition 1: Admissions

## UTESS

The Utah Teacher Education Student Survey is a survey where candidates rate themselves on how prepared they perceive themselves to be for the classroom. The graphs below represent the responses based on survey items, Utah Effective Teaching Standards (UETS) domains, and UET standards. This section shows results for the EPP as a whole.

Note: See Appendix A for complete, organized, and compiled data tables.

### Supporting Statistics

Cleaned and organized data, which was used to create the figures in the report, are presented below. Population totals, observed count sizes, minimum values, maximum values, means, standard deviations, and percentages of the total are provided. The population size varies by as much as 11.49% due to 1) whether candidates who withdrew from the EPP are included in the results, 2) several candidates being listed as having both the major and pre-major, and 3) differences in using Microsoft Excel by EPP support personnel. Since the data was collected by hand, inconsistencies exist.

## Biological Science Education

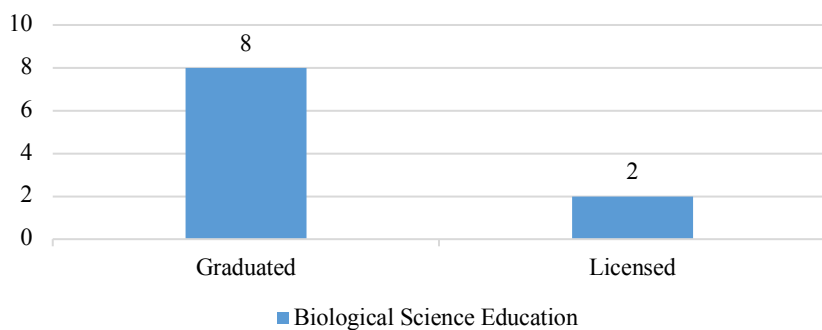

### Administrative Overview

The Administrative Overview goes over the program size and various candidate make up.

In 2017-2018, the Biological Science Education program had 97 candidates enrolled in its pre-major, 3 candidates in Transition 1, 13 candidates in Transition 2, and 11 candidates in Transition 3.

Figure 1. Program Flow

Eight students graduated from Biological Science Education. While some candidates pursue licensure, 6 could not be accurately identified as seeking licensure, or have yet to apply.

Figure 2. Graduated and Licensed

The accurate and available data shows that candidates prefer completing student teaching over an internship, with 100.00% of the candidates choosing student teaching.

Figure 3. Clinical Experiences for T3 Candidates

## Biological Science Education

### Transition 1: Admissions

The following is the beginning of the Transition 1 section. Transition 1 is comprised of candidates who have applied for and been accepted into the major but have not begun course work. This section does not reflect the actual number of candidates admitted to program admissions cohort(s); the data population includes all active pre-majors during 2017-2018 and candidates who have transitioned from pre-major to major but have not yet started major course work at the time of data collection. This section includes results for candidates' GPA, ACT, UTESS, and TSA results.

## GPA

Figure 9. Total and BYU GPA at Admissions

## Biological Science Education

### Transition 1: Admissions

#### UTESS

The Utah Teacher Education Student Survey is a survey where candidates rate themselves on how prepared they perceive themselves to be for the classroom. The graphs below represent the responses based on survey items, Utah Effective Teaching Standards (UETS) domains, and UET standards. This section compares the various Results for each of the UTESS within the program and the EPP as a whole.

Note: See Appendix A for complete, organized, and compiled data tables.

### Transition 3: Clinical

#### UTESS

This section presents the results of UTESS for candidates enrolled in their capstone clinical experience. The graphs are organized by items, UTES domains, and UET standards.

## Praxis

This section presents the results of the Praxis test(s), which candidates must pass in order to receive licensure and be classified as highly qualified.

### Praxis Test 5235: Biology

Note: Test 5235 is scored out of 200 maximum points and a minimum passing score of 149

## Appendix A

---

### Supporting Statistics

Cleaned and organized data, which was used to create the figures in the report, are presented below. Population totals, observed count sizes, minimum values, maximum values, means, standard deviations, and percentages of the total are provided. The population size varies by as much as 6.92 % due to 1) whether candidates who withdrew from the EPP are included in the results, 2) several candidates being listed as having both the major and pre-major, and 3) differences in using Microsoft Excel by EPP support personnel. Since the data was collected by hand, inconsistencies exist; however, these inconsistencies do not exist in over 5.00% of the data. Therefore, the statistics shown below are within a 95.00% confidence interval, as estimated by the EPP office and staff.

# BYU Educator Preparation Program Annual Report

## School Health Education

### Administrative Overview

The Administrative Overview goes over the program size and various candidate make up.

In 2017-2018, the School Health Education program had 0 candidates enrolled in its pre-major, 0 candidates in Transition 1, 2 candidates in Transition 2, and 3 candidates in Transition 3.

Figure 1. Program Flow

Three students graduated from School Health Education. All students received licensure.

Figure 2. Graduated and Licensed

The accurate and available data shows that candidates prefer completing student teaching over an internship, with 100% of the candidates choosing student teaching.

Figure 3. Clinical Experiences for T3 Candidates

# BYU Educator Preparation Program Annual Report

# BYU Educator Preparation Program Annual Report

School Health Education

Transition 1: Admissions

---

The following is the beginning of the Transition 1 section. Transition 1 is comprised of candidates who have applied for and been accepted into the major but have not begun course work. This section does not reflect the actual number of candidates admitted to program admissions cohort(s); the data population includes all active pre-majors during 2017-2018 and candidates who have transitioned from pre-major to major but have not yet started major course work at the time of data collection. This section includes results for candidates' GPA, ACT, UTESS, and TSA results.

No students were admitted into the School Health Education major during the 2017-2018 academic school year.

# BYU Educator Preparation Program Annual Report

## School Health Education

### Transition 2: Preclinical

This section is the beginning of Transition 2. Transition 2 is comprised of candidates who are in the education program and taking classes within their major.

## GPA

Figure 9. T2 Total, BYU, and Major GPA

## Appendix A

---

### Supporting Statistics

Cleaned and organized data, which was used to create the figures in the report, are presented below. Population totals, observed count sizes, minimum values, maximum values, means, standard deviations, and percentages of the total are provided. The population size varies by as much as 0.00 % due to 1) whether candidates who withdrew from the EPP are included in the results, 2) several candidates being listed as having both the major and pre-major, and 3) differences in using Microsoft Excel by EPP support personnel. Since the data was collected by hand, inconsistencies exist; however, these inconsistencies do not exist in over 5.00% of the data. Therefore, the statistics shown below are within a 95.00% confidence interval, as estimated by the EPP office and staff.

# BYU Educator Preparation Program Annual Report

2017-2018 Annual Report

## Appendix A

---

The Appendix provides more detailed statistics and information to support the report.

### Data Collection Method

The EPP Office and its support team combined data from several sources for the 2017-2018 annual report. Data compilation officially began in April and continued through mid-June. These sources include 1) information submitted through the mYlink system, 2) admissions cohort data provided by individual programs, 3) BYU AIMS data, which shows course enrollments, GPAs, and biographical information, 4) BYU SAAS data, which provided information regarding student changes in their program of study (used to measure attrition) in addition to those actively taking classes during Spring term, and 5) the Educational Testing Service (ETS), which administers the Praxis test. The 2017-2018 EPP Annual Report includes active data between August 31, 2017 until the data collection process was complete, which finished around the middle of June. Summer-term results are not included because summer term is still ongoing.

Data from every source was compiled into Microsoft Excel spreadsheets, from which the EPP support team either used Excel functions to input data or inserted data by hand. Every team member understood the coding process before harvesting the data, a process which was a group effort to reduce error.

Each variable in the dataset represents the candidates' current position in the EPP as of the collection date. For example, candidates who progressed from Transition One to Transition Two during the 2017-2018 Annual Report window are considered Transition Two candidates. Consequentially, results for GPAs, population totals, etc. represent candidates' recent activities (i.e., results from the last active semester/term completed, typically Winter 2018 or Spring 2018).

The final population size for all programs, including candidates who left Educator Preparation Programs, reached 3,628 candidates.

### Variable Definition and Operationalization

A list of several key variables is given below. The process used to define and gather the variable's content is also explained.

Name, last and first:

- Last and first names were gathered for each candidate using the data listed on AIMS. In the cases where a female candidate married and had a name change, the current name, as shown on AIMS, was used.

Age / Date of Birth:

- Candidate's date of birth was determined by AIMS data. An Excel formula was then used to calculate current age.

Gender:

- Gender was determined by AIMS data using the following codes: 0=female, 1=male.

Ethnicity:

- Ethnicity was determined by AIMS data.
- Hawaiian ethnicity was combined with Pacific Islander.
- A separate code was used for candidates with multiple ethnicities.
- When ethnicity was not specified in AIMS, the candidate was coded as "unknown."

Marital Status:

- Marital status was determined by AIMS data using the following codes: 0=single, 1=married, 2=widowed, 3=divorced, 4=undeclared.

# BYU Educator Preparation Program Annual Report

2017-2018 Annual Report

## Appendix A

### Socioeconomic Status:

- Socioeconomic status was determined by AIMS data in conjunction with IRS data on zip codes (see “SOI Tax Stats – Individual Income Tax Statistics – Zip Code Data (SOI) for 2015, <https://www.irs.gov/statistics/soi-tax-stats-individual-income-tax-statistics-zip-code-data-soi>.)
- AIMS data includes a permanent address, mailing address, and identifies a candidate’s hometown. Where listed, permanent address was prioritized first, hometown second, and mailing address third. The permanent address and mailing address data on AIMS includes a zip code; however, the hometown indicator does not list a zip code. In the cases where a candidate did not list a permanent address and hometown was used, the EPP support team searched Google for the city’s zip code online and used the first zip code listed. For example, Orem, UT has four zip codes. If a candidate’s hometown was listed as Orem, UT, the first zip code was used, which is 84057.
- For candidates with a BYU zip code or a Provo zip code for permanent and mailing address with a different hometown location, the hometown location was prioritized based on the assumption that the hometown location is a more accurate portrayal of where the candidate grew up and attended high school than is a BYU or Provo zip code.
- International candidates were not included in this analysis. Instead, their home country was listed instead. For example, a student from Taiwan with a permanent address of Provo, UT with a zip code of 84604 was listed as Taiwan in the dataset rather than by the Provo zip code.
- With zip codes harvested, the IRS data was then consulted. The IRS data lists income level using six (6) categories and lists how many people are in each category, as follows: category 1 = \$0-\$25,000; category 2=\$25,000-\$50,000; category 3=\$50,000-\$75,000; category 4=\$75,000-\$100,000; category 5=\$100,000-\$200,000; category 6=\$200,000+. Each zip code shows the number of how many people are in each of the six categories.
- Using this data, the populations for each category were multiplied by the category’s highest dollar value (e.g., category 1=\$25,000).
  - Note, the EPP support team acknowledges the IRS data is given as a range while this conversion uses the ranges’ highest dollar values. The logic behind this decision is that people try to minimize the amount of money they report to the IRS to pay less on their taxes. Therefore, the EPP support team assumes people are more likely to be clustered along the highest dollar value of any given range.
- Next, the sums for all six categories of a zip code were compiled and then averaged by the total number of candidates. This process provided greater variability in the income scores rather than the scores remaining confined by the six categories. After the conversion, both the original category and the converted income range were kept in the dataset for each student.

### Pre-major:

- Pre-major was determined by AIMS data. Only active pre-majors were included.

### Major:

- Major was determined by AIMS data. Only active majors were included.

### Minor:

- Minor was determined by AIMS data. Only active minors were included.

### Graduation:

- Graduation was determined by AIMS data, coded as follows: 1=graduated, 0=candidate is in Transition Three but not yet graduated, and 999=missing/not a Transition Three candidate.

### Licensure:

- To determine whether a completer had received licensure, EPP team members consulted the Utah State Board of Education teacher search (see <https://cactus.schools.utah.gov/PersonSearch>). The following codes were used: 0=no licensure, but graduated, 1=licensed, 2=cannot verify if Cactus data matches roster. This problem is due to the lack of unique identifiers. For example, a name like Sarah Jones may appear upwards of ten times in the Cactus database, so the database does not include enough information to confirm which one of those “Sarah Jones” is the Sarah Jones in question.

# BYU Educator Preparation Program Annual Report

2017-2018 Annual Report

## Appendix A

---

### Withdrawal:

- The number of candidates who withdrew from Educator Preparation Programs is determined by candidates who had all EPP majors or minors expire during the 2017-2018 annual report time frame (August 31, 2017-July 2018). For example, a candidate who had an Elementary Education major expire in September 2017 is counted in the withdrawal statistic. Students who did not have an active EPP major or minor within the time window are not included in the dataset. AIMS data was consulted for this information.

### Transition:

- The population is divided into three transitions, based on progression in the candidate's program of study. Candidates fall within Transition One (T1) until an admission decision is made. Transition One also includes all pre-majors, regardless of the progression in that pre-major. Transition Two (T2) includes candidates who have been accepted into the EPP major and are currently taking courses on BYU campus, as well as those completing the first stage of their field-based learning (e.g. practicum experience). Transition Three (T3) includes candidates who are currently enrolled in their Student Teaching or Internship experience.

### Ten Percent:

- Students who do not qualify for program admittance may still be admitted under a "ten percent" exception. For any program, ten percent of the candidates may be admitted without the proper qualifications (e.g., qualifying ACT/SAT results, satisfactory GPA, etc.). The information on this variable is drawn from this year's previously completed reports by the EPP directors with supporting data from each individual program.

### Total GPA:

- Total GPA is the average grade point average for all college courses, including credit hours from other institutions and credit hours from BYU. Total GPA was gathered from AIMS data.

### BYU GPA:

- BYU GPA is the average grade point average of all BYU courses, including those from minor and general education courses. BYU GPA was gathered from AIMS data.

### Major GPA:

- Major GPA is the average grade point average for all classes within the candidate's major, excluding all courses outside the specific major. Major GPA was gathered from AIMS data.

### ACT and SAT scores:

- College entrance exam scores from the ACT and SAT were gathered through AIMS data and the BYU Registrar's Office. To provide consistent data, SAT scores were converted to ACT scores, which is explained in the next section of the appendix (Data Transformations).

### Technology Skills Assessment (TSA):

- TSAs are completed at the TEC Lab in the McKay building, its scores uploaded into mYlink, and its results downloaded from mYlink. The TSA has four sections: Word Processing, Spreadsheets, Presentations, and Internet & Communication. Scores are graded as pass/fail. Additionally, TSAs are analyzed for how many candidates took the exam a second or third time before passing the assessment. TSAs are coded as follows: 1=pass, 0=fail.

### Utah Teacher Education Student Survey (UTESS):

- The UTESS is a candidate survey completed through the mYlink system, where the data is downloaded from. The 29 survey questions focus on how well candidates feel prepared to engage in the classroom and with students, design assessments, use technology, follow federal laws and keep student confidentiality. Scores range from one through four (1-4): 1=Not at All, 2=Minimally, 3=Effectively, 4=Exceptionally.

### Utah Effective Teaching Standards (UETS):

- The UETS are Utah's ten teaching standards as established by the Utah State Board of Education. These standards act as the framework for all EPP teacher preparation programs. The UETS are measured through such EPP assessments as the PAES, RTWS, and UTESS.

### Core GPA:

- All EPP students are required to take several core EPP courses regardless of education major. The results for these courses were gathered from AIMS data.

# BYU Educator Preparation Program Annual Report

2017-2018 Annual Report

## Appendix A

### Utah Teacher Candidate Performance Assessment & Evaluation System (PAES):

- PAES has 22 items across the ten UET standards and is scored on a zero through three (0-3) scale: 0=Not Effective, 1=Beginning, 2=Developing, 3=Preservice Effective. PAES measures candidates' knowledge, skills, and dispositions during clinical experiences. PAES data is downloaded directly from the mYlink system.

### Praxis:

- Praxis is administered by the Educational Testing Service (ETS) and is scored out of 200 points. Each exam has its own cut score (determined by the Utah State Board of Education) to accommodate the content and meet the needs of the Utah educational system. Praxis tests are Utah's content licensure exams required for teachers to be designated as highly qualified. Praxis tests are analyzed by candidate major. Praxis scores were downloaded from the ETS website.

### T3 Clinical Experience: Internship and Student Teaching:

- During Transition Three, candidates either complete an internship or a student teaching experience. This variable is coded as follows: 1=Internship, 2=Student teaching. Population data for Intern / Student Teaching are determined by course enrollment per AIMS.

### Renaissance Teacher Work Sample (RTWS):

- The RTWS is completed during Transition Three and is scored on a one through three (1-3) scale: 1=Indicator Not Met, 2=Partially Met, 3=Indicator Met. RTWS is a capstone assignment that measures candidates' knowledge, skills, and dispositions during clinical experiences. Scores are downloaded directly from the mYlink system.
- Due to technical errors in the mYlink system, some students were assigned the BYU Teacher Work Sample (TWS) during Fall 2017 instead of the RTWS. The BYU TWS results are not presented in this report, only those students who had the RTWS.

## Data Transformations

The EPP Support Team made the following changes to ensure consistency in the analysis of data:

- PAES (Transition Two US, Transition Three US and MT):
  - Item 10.1 and 10.2, which are scored as either "Yes" or "No," were changed to a score of the maximum possible points. For the case of practicum one, "Yes" was considered as one (1) point. For the case of practicum two, "Yes" was considered as two (2) points. For the case of student teaching/ internship, "Yes" was considered as three (3) points for a "Yes" answer and zero (0) points for a "No" answer. Microsoft Excel was used to make the transformation.
- SAT Scores
  - Several students choose to submit SAT scores rather than ACT scores. Since more BYU students submit ACT scores than SAT scores, all SAT scores were converted to ACT scores. This transformation used Microsoft Excel functions in conjunction with the Concordance Tables published May 9, 2016 by CollegeBoard.org (<https://collegereadiness.collegeboard.org/pdf/higher-ed-brief-sat-concordance.pdf>) and BYU AIMS data, which provides SAT composite scores converted to ACT composite scores for some but not all candidates.
  - Of the 3,400 candidates with ACT and SAT scores, 649 (19.09%) candidates had SAT scores; all SAT scores were converted to ACT scores using Excel formulas. In the case of some candidates showing both ACT and SAT scores, ACT scores were used for analysis and SAT scores were ignored.
- Utah Effective Teaching Standards (UETS) for UTESS:
  - Each item in the UTESS corresponds to one or more of the ten (10) Utah Effective Teaching Standards (UETS). In the case where a UTESS item corresponds to two of the UETS, the UTESS item's score is used multiple times to calculate the UETS score. For example, UTESS item 3 reads, "Provide instruction that addresses learners' cultural differences," which corresponds to UETS 2 and UETS 7. In this case, the candidate's UTESS item 3 score is used to calculate both the UETS 2 and UETS 7 results.
  - Of the twenty-nine (29) UTESS items, eight (8) (27.59%) correspond to two UETS items.

# BYU Educator Preparation Program Annual Report

2017-2018 Annual Report

---

## Appendix A

---

- UETS Professional Domains
  - The UETS Professional Domains are The Learner and Learning, Instructional Practice, and Professional Responsibility. After separating each question into the ten UETS standards, the appropriate standards were combined by professional domain and then analyzed. UET standards one through three (1-3) are associated with The Learner and Learning domain, standards four through seven (4-7) are associated with Instructional Practice, and standards eight through ten (8-10) are associated with Professional Responsibility.
